Welcome to **ALRO**

WHO WE ARE:

ALRO Services Ltd. & ALRO 2002 Ltd. specialise in drainage schemes for small communities (up to 2000 residential population equivalent), encompassing all types of waste water treatment and pumping systems for discharge to ground, inland or marine waters to serve both new and existing properties such as housing developments, schools, institutions, hotels, public houses and leisure complexes etc.

A total of over 30 years of experience in drainage and the use of packaged equipment provide us with an unrivalled background from which to offer cost effective and practical solutions to effluent disposal problems.

Over the years we have gained approved installer status from most leading manufacturers of packaged sewage handling equipment, whilst continuing to maintain our independence.

All work is carried out by our own employed skilled and fully trained staff to ensure installation and maintenance is completed to a fully guaranteed standard of workmanship.

WHAT WE DO:

We design, install and maintain Packaged Sewage Treatment Systems, Pumpstations, Gravity Sewers, Septic Tanks, Sealed Cesspools, Main Sewer Connections and Surface Water Drainage Systems.

We undertake assessments of existing systems covering the structure, performance and capability, refurbishment schemes, flow and analytical surveys as well as drainage surveys and CCTV investigation.

We are certificated to carry out work in the highway and works that involve confined space entry. We can engage in negotiations with The Environment Agency, Water Authority and Building Control on your behalf.

We have many years of experience in the long-term care of Sewage Treatment and Pumping Systems providing a competent backup for trouble-free long-term operation of equipment.

Our experience extends to system management, operation and ongoing maintenance of sewage treatment and related systems, hence we offer a wide ranging ability to resolve issues and problems that may arise out of process inhibition or equipment based factors.

We offer a complete Service and Emergency call-out package to ensure sewage systems and pumping stations are serviced regularly in accordance with the manufacturer's recommendations.

All sewage systems require some form of maintenance. Even those well maintained will eventually wear out. We are able to evaluate existing and poorly performing units and advise whether full replacement of the current system is required or if the system can be refurbished, which very often can be successfully undertaken at a fraction of the cost of full replacement.

Our stores department retain a comprehensive stock of spares and parts at all times. A basic stock of most commonly used parts is also carried by our team of Engineers enabling us to ensure your system is kept running smoothly with no costly return visits.

Through our long standing and valued relationships with manufactures and suppliers, we are able to source a wide range of equipment and parts including mechanical to electrical components in good time and at competitive prices.

CLIENT BASE:

Our customers include The Home Office, The Crown Estates, The National Trust, The Caravan Club, The Duchy of Cornwall, The National Autistic Society, Local Councils, Housing Associations, and many other high profile corporate & private individuals.

We also carry out maintenance, repair and warranty work on behalf equipment manufacturers such as KEE, WPL and Kingspan Environmental who are the parent company for the market leading Klargestor & Titan/Entec brands.

HEALTH & SAFETY:

ALRO Services Ltd. is committed to ensuring that Health & Safety Legislation is adhered to at all times. All works carried out by our company or our subcontractors are carried out in accordance with current legislation. Each site is assessed on an individual basis and measures taken to ensure the safety & protection of our employees, clients & members of the public. We are currently UVDB (Achilles), CHAS, Safe Contractor & Construction Online registered.

STAFF TRAINING:

Our staff and management hold British Water Certification, Confined Space Entry & Part P Electrical Installation qualifications to name but a few enabling us to offer one of the most complete services available.

Our staff members are also checked with the Criminal Records Bureau allowing us to work with clients who need to protect children and vulnerable adults when recruiting people into positions of trust.

ENVIRONMENTAL POLICY:

ALRO Services Ltd. adopts a responsible and professional attitude in the management of its operations by minimising their effect on the environment.

The Company management is totally supportive of its employees, by training and encouragement, enabling all concerned to implement and contribute to its policy of continued improvements in environmental matters.

OUR MISSION:

ALRO Services Ltd. constantly monitors its performance and endeavours to implement improvements whenever possible. Our aim is always to meet or exceed customer's expectations and provide goods & services on time and within budget.
